TEST RESULTS

Sanitise with Steam

Struggling to clean and sanitise different floor surfaces?

The easiest way to sanitise any floor surface is using steam. The Duplex range of floor steam cleaners have been certified to do just that and the graph above shows the log 10 reduction achieved when using our range without any cleaning chemical or detergent. The range features twin cylindrical brushes, right to the edge cleaning, carpet drying time of 15 minutes. They are light and easy to use, have twin water pick-up and the debris is efficiently removed and deposited in the recovery tank for safe disposal.

Remove stains and odours

Do you find it hard to keep carpets and hard floors clean and odour free?

As we know carpets and hard floors are especially difficult to clean in the nursing and care home environment and keeping up with the cleaning and sanitising demanded in these settings can be very challenging. If these floors especially carpets become stained and odorous they can need replacing at great cost and disruption to residents. Duplex floor steamers offer an excellent solution removing even stubborn stains and delivering steam at temperatures high enough to kill odour-causing bacteria leaving surfaces clean, fresh and dry within a very short space of time, with the added bonus of lengthening the life of all floor coverings.

Our Most Versatile Sanitising Floor Machines

Duplex 340 and 420 Steam

The Duplex 340 and 420 floor steam cleaning machines are the most manoeuvrable and versatile carpet and hard floor machines on the market. In the nursing and care home

environment they come into their own, not only having the ability to be used on all types of flooring but sanitising and cleaning thoroughly as well. The ease of use is invariably preferred by operators to other types of floor cleaners including hot water extraction and rotary machines. The fact that they clean all types of flooring means that the operator can move effortlessly from carpet to hard floor and back without the need to change brushes or chemical.
