

April 2020

Dear Customer,

Despite guidance to use an ethanol/isopropanol-based disinfectant to eradicate coronavirus, I can confirm that other alcohol-free biocidal agents are also effective against SARS-CoV-2.

Vernacare's Azo Universal (formerly AzoMax) products for example, are effective against the virus, independently tested to industry standards.

For further information, please contact either myself or our Customer Services team on +44(0)1772 299932 or alternatively email us on info@vernacare.com.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Chris Socratous", with a long horizontal flourish extending to the right.
