

# Titan Sanitizer

## Titan Sanitizer

### Description

Chlorine based concentrated detergent sanitizer powder.

### Key properties

- Chlorine based detergent.
- Fast dissolving powder.

### Benefits

- Effective sanitising of equipment, hard surfaces, walls, floors and instruments.
- Can be used neat or as a solution depending on task.

### Use instructions

For general use. Dilute 10g/litre with hot water (1 scoop = 50 grams in 5 litres).

Apply with a mop, sponge or cloth or spray bottle. Allow 5 minutes contact time before cleaning and rinsing with fresh water.

For cleaning & disinfection (NHS guidelines): Dilute 50g in 1L of warm water to give 1000ppm.

Allow 5 minutes contact time before cleaning and rinsing with hot water.

Product may also be applied undiluted for heavy duty cleaning such as chopping boards or work surfaces.

Sprinkle onto a clean moist cloth or sponge or directly onto the surface and wipe clean.

Rinse thoroughly with clean water and allow to air dry.

To use with urine spillages in the medical area, sprinkle Titan Sanitizing powder over the spillage to give 10000 ppm of available chlorine as recommended by NHS guidelines. Allow a 5 minute contact time.

# Titan Sanitizer

## Technical data

Appearance: Blue, free flowing powder

pH (1% solution): 9.5 - 10.5

*The above data is typical of normal production and should not be taken as a specification.*

## Safe handling and storage information

Avoid contact with skin and eyes. Rinse and dry hands after use, for prolonged contact protection of the hands may be necessary. Do not mix with any other chemicals other than as advised by your Diversey representative. Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; [sds.diverseyst.com](https://sds.diverseyst.com). Store in original closed containers away from extremes of temperature. Only for professional users / specialists.

## Product compatibility

Does not use with viscose cloths as fumes can be generated. Avoid contact with fabrics/furnishings/carpets. Do not mix with acid products. Rinse immediately after use on plated chrome or gold surfaces.

## Microbiological data

Titan Sanitizer has been formulated to give 100 ppm available chlorine when diluted at 5g per litre.

Generally accepted chlorine levels for common disinfecting tasks are as follows:

General environmental disinfection (Hospitals (50g) 1,000 ppm)

Blood and Body Spillage (500g) 10,000ppm

Efficacy proven by compliance with: EN1276, EN13697, EN13704 against *C. difficile*, EN14476 against avian influenza and EN14476 against Murine Norovirus.

## Available pack sizes

Product is available in 12x500g and 1x 1kg.
